Water Meters

Redefining Precision: New Zealand's most accomplished Smart Meter range.

SENSUS metering products including Cordonel, MeiStream Plus, Iperl and 640 offer proven reliability and exceptional metering performance in New Zealand conditions, and are all seamlessly compatible with the SENSUS RF AMR/AMI data acquisition solutions.

DEECO offers advanced solutions and proven expertise for every metering application in your Smart Network, and valued tools for water sustainability management.

Backflow Preventers

Flow with confidence: Safeguarding Water Supply with New Zealand's leading Backflow Prevention Solutions.

ZURN WILKINS innovative and service friendly backflow prevention devices from Deeco are a favourite amongst Water Suppliers, Plumbers, Contractors and IQP's. Fully compliant with AS5081 and offering long lasting reliability and ease of service.

DEECO's pre-assembled and tested pipestand assemblies provide all the necessary requirements for consistent and correct installations.

Air Valves

Breathing Efficiency into Pipelines: Reaching optimum performance through effective Air Management.

BERMAD and VENT O MAT High Performance Air Release and Vacuum Break Valves are critical components of efficient and reliable pumping and pipeline systems, providing a wide range of Air Control Functions and performance characteristics from Low Head sealing to Anti Surge closure.

DEECO offers know-how and experience to assist in the design and selection of High Performance Air Valve solutions for optimum pipeline operation.

Control Valves

Performing under Pressure: Controlling Water Supplies in every district.

BERMAD 700 SIGMA series and extensive accessories offer the most versatile and high performance Control Valves available today, backed by New Zealand's control valve experts. Packed with critical features for comprehensive pressure and flow control management BERMAD helps water suppliers achieve waterloss reduction and sustainability targets. Rely on BERMAD to perform under pressure.

DEECO's extensive knowledge and many years of experience across a wide range of applications mean you can trust in our advice and support for many years to come.

Filtration & Screening

Solid Foundations for Safe Water Supply – leading the pack right up front.

SCREEN, DISC and WEDGEWIRE filtration provide critical steps in water and waste treatment streams – our innovative and industry leading pre-screen and automated filtration solutions offer significant Opex benefits, long term reliability, and efficiency you can rely on up front.

DEECO offers filtration design and selection support with an expert understanding of system hydraulics and operational needs to ensure optimum filtration performance, which in turn supports downstream process needs.

Irrigation Controllers

Where Precision Meets Growth: Cultivating Excellence with Smart Automation Irrigation.

TALGIL's Irrigation Controller Range is a Cloud-enabled irrigation management system that combines various hardware, software and radio communication components together with analytical tools and an advanced user interface into one all-inclusive and powerful centralized crop management system.

DEECO offers expert remote and on-site technical, installation and troubleshooting support providing peace of mind that your critical systems are fully automated.

MAKING COMPLEX SIMPLE

EXPERIENCE

With a carefully selected suite of Control, Measurement, Filtration and Automation products from world leading manufacturers, DEECO empower organisations in New Zealand and the South Pacific to deliver sustainable, high-quality water services by providing expert knowledge, innovative solutions, and best-in-class products.

At 85 years old and 4 generations of progressive leadership DEECO's experience runs deep. We think long term, relying on this experience to guide our activities and professional advice every day - you can trust DEECO's work, and that we will be here to back it up long into the future.

KNOWLEDGE

With factory trained staff and long standing supplier relationships, DEECO have a deep in-house knowledge of our products both past and present. We are committed to sharing our knowledge by providing training on product selection, set up, operation and maintenance to ensure optimum performance of these valued assets.

SUPPORT

DEECO's nationwide team of dedicated engineers welcome every opportunity to support commissioning and service of our products remotely or in the field, we are passionate about what we do and determined to deliver exceptional service and solutions in all water industry sectors.
